PROJECTS

- Ansatsu
Application Overview: ANSATSU KYOSHITSU SCHOOL (AKS) is a comprehensive school management application designed primarily for teachers. Its core objective is to empower teachers by providing them with robust tools to manage classrooms, students, and subjects efficiently.
<https://github.com/adammwaniki/ansatsu-kyoshitsu-project>
- Bikes for Beginners
An interactive platform for beginner motorcycle riders that provides tips, guides, and resources to start riding safely.
<https://github.com/Alistairs01/Bikes-for-beginners.aim>

- Autocars
A gallery of cars and their prices and reviews.
<https://github.com/Alistairs01/Autocars>
- Hunters Association
This is an application based on the game Solo Leveling arise. Players can buy equipment for their characters giving them a fighting chance against the monsters they fight.
- Dad Jokes
A command-line interface (CLI) application for managing users and their jokes. This application allows you to create, update, delete, and list users and jokes, with data persistence in a SQLite database.
https://github.com/Alistairs01/Dad_jokes_project
- Tech Study
A productivity tool designed to help students manage their study schedules and track their progress.
